

## Economical reagent for routine transfection

EcoFect Reagent is an economical reagent dedicated to the transfection of popular cell lines. It is the perfect solution to quickly analyze the biological activity of your nucleic acids, to perform routine transfection assays at low cost and to accomplish high throughput screening.

EcoTransfect is convenient for transfection of nucleic acids in the most commonly cell types.

## Order Information

Prod. No.	Description	Quantity
S910500	EcoFect Reagent	500 µg
S911000	EcoFect Reagent	1.0 ml
S913000	EcoFect Reagent	3x 1 ml
