

Dialysis membrane tubings are made of high quality Regenerated Cellulose. They are produced with the highest care and attention to quality and stability. Still, they are extremely cost effective. The membranes are supplied dry containing glycerol acting as a preservative. Thus, the membranes should be cleaned before use.

To further help the user in his lab, each box includes:

Two free of charge dialysis membrane clips
Technical manual
Analytical data sheet (except D14b range)

In order to prevent any damage to the membranes during transport, the membranes are packed in a carton. This carton is packed in a seal bag containing a desiccant and the bag is packed in another thick carton box.

Order Information

Prod. No.	Description	Quantity
H92054	Herpes simplex virus 1 type	80 + 10 + 10
H92053	Herpes simplex virus 1/2 type	80 + 10 + 10
H92055	Herpes simplex virus 2 type	80 + 10 + 10
